

Hennepin Youth Sports Program Criteria 2012

Creating Opportunities (15 points)

Projects received a higher score for creating new net recreational opportunities. Renovation projects received a medium score for demonstrating recreational opportunities would be sustained or increased. Projects maintaining current opportunities received a lower score.

Number of people served (15 points)

Self-explanatory.

Population served (10 points)

Population served takes into consideration the socio-economic factors of the potential user groups.

Partnerships (20 points)

Projects that have active partners involved in contributing funds, managing the facility, volunteering, and expressed support will receive more points for this category.

Match ratio (20 points)

See table.

Sustainability (10 points)

Projects are expected to demonstrate a formula for providing ongoing operational support for the facility. Renovations and improvements of current facilities that don't increase the current cost of maintenance and operation receive the full amount of points. New facilities that include increased operations and maintenance costs and facilities whose useful life is 20 years or less had points deducted.

Environmental improvements (10 points)

Creation of new green space, water run-off control, and energy efficiencies received points for this category. New irrigation projects received 1 additional point.
